RMW2

RMWRARH

WINCH HANDLE HOLDERS: UNIVERSAL WINCH HANDLE HOLDER AND PAIR OF CLOCK WISE AND COUNTER CLOCK WISE WINCH HANDLE HOLDERS

The inclined cut and notch in the upper part of the holder allows the winch handle to be stowed against the cockpit.

ERGONOMIC AND EFFICIENT

These winch handle holders are used on large racing yachts to store and facilitate the use of the winch handles.

EASY INSTALLATION AND REMOVAL

Quick and simple installation. Remove when the boat is in port, for better protection against UV and weather. Facilitates cleaning and winterizing.

Reference : RMW2 et RMWRARH
Dimensions : L10 x H35 x E07 cm
Color : white
Weight: 0.15 kg

Characteristics : Body in polypropylene 100% recyclable fabric, back in polyethylene 18/10, opening reinforced with Eva foam, border in polypropylene webbing.

WINCH HANDLE HOLDERS: UNIVERSAL WINCH HANDLE HOLDER AND PAIR OF CLOCK WISE AND COUNTER CLOCK WISE WINCH HANDLE HOLDERS

How to choose ?

🎯 Location onboard relative to an object: Pair of clock wise and counter clock wise winch handle holders :

If there is an object (rope bag, bulkhead, door ...) next to the winch handle holder. Choose the RMWRHRA which can store the winch handle in the opposite direction of the object.

🎯 Location on the boat relative to the winch: Pair of clock wise and counter clock wise winch handle holders

If there is no object near the winch handle holder, the choice is made with respect to the location of the winch.

Choose the RMWRA if the winch handle is stored to the right of the winch.

Choose the RMWRH if the winch handle is stored to the left of the winch.

Pair of clock wise and counter clock wise winch handle holders (RMWRARH): allow the winch handle to be stored always in the same direction.

🎯 The Universal Winch Handle Holder (RMW2) allows the winch handle to be stored neatly in all cases.

RACING OPEN ROPE BAGS

Racing by Outils Océans has been created to answer the call for lightweight sturdy rope bags and accessories.

With a new design and material, our Racing rope bags are on average 20% lighter.

They retain their shape and don't deform.

Solid and durable, they have been tested on the new Ultime trimarans and IMOCA Open 60s.

EASY INSTALLATION AND REMOVAL

Quick and simple installation.

Remove when the boat is in port, for better protection against UV and weather. Facilitates cleaning and winterizing

Dimensions : L16 x H19 x ep06cm

Weight : 0.20KG
Color : Grey

Characteristics : Fixing by 2 mushrooms and locking slat, gaping opening, reinforced with a flap which closes with Velcro.

Rigid polyethylene back, 100%* polypropylene body and flap, polypropylene webbing finishing border.

*Fully recyclable material as it is a single material without chemical additives.

TM804010,3C,2RB

THE 3 COMPARTMENTS SOFT STORAGE LOCKER

Specially designed for multiple applications as sailboat, rigid inflatable boat, boat fishing cruiser trip or simply in a cove locker.

CONVENIENT

2 flap pockets on the upper part and in the lower part, another long pocket without gusset to store equipment of all types (rope, palm, boat hook, oar, fishing equipment...). An easily removable fixation system thanks by lashing using fixing loops. The soft storage locker will follow you wherever you go and with all your equipment, ready to use.

MODULAR

Line them up and adjust your storage. Once connected, the semi-open bottom pockets will allow you to store over-sized long equipment.

Reference: TM804010,3C, 2RB

Dimensions: L80 x H40 X ep10cm

Dimension of the 2 closed pockets: L35xH15xep10cm

Dimensions of the long pocket: L74xH15xep10cm

Weight : 1.30 kg

Colors: Black

Arrangements: body reinforced by straps with fixing loops, 2 pockets with external cartridge belt, adjustable flap and clasp, 1 long pocket with opening by adjustable bungee cord (and / or removable if modulated) in the lower part - The upper part of the pockets is provided rods to give more rigidity and ease of opening, possibility of coupling several storage lockers with junction of the bottom pockets, if necessary.

Materials: body and pockets in 2-sided PVC coated polyester, bottom of the pockets in double sided PVC coated polyester mesh, polypropylene webbing reinforcements (BLACK), adjustable plastic clasp buckle.

STORAGE SOFT LOCKER

3 COMPARTMENTS, MODULAR

Organized storage, protected material

- 1 The 2 pockets with flap on top come with an adjustable clasp. Your belonging is then protected from ocean spray.
- 2 Mesh fabric for the bottom of the pockets prevents water stagnation.
- 3 A 2 elements cartridge belt on the inside face pocket for storing clamp, knives and various tools if needed.
- 4 The long bottom pocket without bellow is just made to store quickly and easily long objects. At each end you will find (removable if necessary) a bungee cord with a pickup and a strap with adjustable middle clasp to compress everything.
- 5
- 6

Handy fastening systems

- Loops allow you to attach either by lashing using padeye or trigger guard (no provided)
- 6 Either as a sheath by passing your lifelines, inflatable lifeline or the two of them. These loops are arranged all around in periphery of the locker, 5 at the top, 3 at the bottom and one in the middle of the sides.

Fit your boat, your needs

Whether on a sailboat, a rigid inflatable boat, a boat fishing cruiser trip or simply in a cove locker, this soft storage locker will follow you everywhere.

LEE CLOTH

The lee cloth Outils Océans was designed to fit different sized bunks with 3 attachment loops on top on each side.

It is held down by two attachment loops and has a reinforced bottom that folds under the bunk and fixed by screws.

The material has openings for air flow and reinforcements ensure great strength and durability.

Reference : TM17073

Dimensions : L170 x H73 cm

Characteristics :

- Reinforced around the perimeter and 2 vertical reinforcements
- Loops for adjusting the length to 170 /145 / 120 cm
- Loops for attaching the base
- Flap to be placed under the bunk and fastened with screws (not supplied)

Material:

- PVC coated polyester mesh (White),
- Flap PVC coated polyester 2 sides (White), 8cm
- Reinforcements polypropylene webbing (Black)

Handheld VHF Holder - ref : PP101505,I

HANDHELD VHF HOLDER

Prioritise safety – keep your VHF radio within easy reach.

The Outils Océans VHF holder is designed to provide a practical, elegant, and secure indoor storage solution for your VHF radio. Made from durable fabric with reinforced edges, it protects your equipment effectively while ensuring quick access in the event of an emergency or when manoeuvring.

QUICK ACCESS FOR ENHANCED SAFETY

Your portable VHF is always in position, ready to ensure your safety

Location: to be installed at the watch station, near the chart table, or even inside a cabin

Immediate access: top opening allows quick and easy handling

ROBUST AND ELEGANT HOLDER

Optimal protection: guards against scratches, light impacts, and ambient moisture

Refined design: heather grey fabric with black finishes

Made in France: a guarantee of quality and traceability

References : PP101505,I

Colour : Heather grey

Size : L10 x H15 x D5 cm

Weight : 63g

Features : Structure: Semi-rigid design that retains its original shape over the year • Mounting system: Two mushroom fasteners (screw-on or adhesive options) • Supplied with instructions, fasteners, and screws. Includes a locking strip • Installation/removal: Quick and tool-free.

Materials : 100% recyclable • Semi-rigid back panel made of polypropylene • Body in polypropylene fabric • Edges finished with polypropylene webbing

Smartphone Holder– ref : PP111804,2C,SW

BAYAPHONE – SMARTPHONE CASE FOR SAILORS

The smartphone has become an essential tool — yet it remains vulnerable.

Outils Océans' Bayaphone holds and protects smartphones on board, even in the toughest conditions.

Phones stay accessible, usable, charging, and secure.

Lightweight, practical, and reliable, the Bayaphone is designed for life at sea.

It protects what has become both a vital safety tool and a valuable personal device.

ALWAYS READY, ALWAYS SECURE

Weather, navigation charts, communication — your smartphone is always within reach, serving your safety and comfort. Whatever the type of boat or navigation, protect access to your data by installing your Bayaphone at the chart table, in cabins, or in the cockpit.

ELEGANT AND FUNCTIONAL SUPPORT

The Bayaphone provides quick one-handed access to your smartphone, with side buttons fully accessible and the screen clearly visible. Its heather grey color and discreet black finishes give it a sleek, elegant look while providing effective protection against drops, shocks, and scratches — even in rough seas.

Made in France, it combines quality, durability, and traceability, meeting the highest standards of professional marine equipment.

Reference : PP111804,2C,SW

Color : Gris chiné

Size : L11 x H18 x E5 cm

Weight : 68g

Layout and Features : Semi-rigid support with 2 compartments: 1 main compartment and 1 flat pocket • Flat elastic cord for secure holding • Charging cable port and storage gusset for the charging plug • Quick and tool-free attachment using stick-on or screw-on mushroom fasteners (instructions and hardware included) • Compatible with most smartphones

Materials : Semi-rigid structure in PE 18/10 (Recycled and Recyclable) • Fabric: 100% polypropylene (300 g/m², recyclable, UV- and abrasion-resistant) • Polypropylene finishing edging • Recycled PE mushroom fasteners

PP182511,RV,I

The matos - ref : Matos60/ Matos70

THE MATOS

Stacking bags exclusively designed by Outils Océans in collaboration with the greatest skippers.

BEST OF A BOX AND A BAG

Solid and structured to carry heavy equipment without deforming (anchor, tools, hardware, jerry cans ...).
Lightweight and foldable to compress the unused volume and save space.

NO LOAD LIMITS

The design and materials used allows the gear to be loaded until we can no longer carry it. The limit is that of the user

Reference :

Matos60 L60 x H28 x E28 cm
Matos70 L70 x H32 x E32 cm

Color : red, navy, green, yellow

Characteristics : one large compartment which opens completely with 2 flaps, zip closure, handles at each end, 2 multi-use cords: carrying, compression of the bag, 1 list holder

Materials : rigid body 18/10th polyethylene, body and sides 2 sided PVC coated polyester, velcro flaps, injected nylon zipper, strap and, polypropylene border, crystal PVC carrier list.

Option : 2 removable division pockets.

THE MATOS BEST OF A BOX AND A BAG

Division pockets (optional) :
2 removable pockets are available to compartmentalize The Matos and organize your gear.

Flaps :
2 flaps for direct access to the content when the bag is in a small space (bunk, ...).
Opens and closes with one hand.

List Holder :
Listing the contents directly on the bag is the best way to find your gear.

The lines that do all : sailors, tie your knots!

Carry Straps :

you choose how to carry your Matos :

with the handles at the

with handles on the sides

with the handles over the top

Space saving

When empty, the bag folds completely.

When the bag is loaded : It can be tightened to maintain the contents compact. The gear stays in place in the bag.

When the bag is full you can stack another bag on top.

Compartmentalize your matos with inside pockets.

The traveler's bag - Réf. : SC703232N

*Made from 100% recyclable fabric

THE TRAVELER'S BAG

This travel bag, with its large of available space, is perfect for storing and carrying both your personal belongings and your equipment onboard. Thanks to its flexibility, once emptied it can be easily folded for storage in a trunk, ready to accompany you again filled with memories.

PRACTICAL

Large storage capacity with quick access to contents. A shoulder strap and handles provide ergonomic carrying options to suit your preference.

EFFICIENT

A simple design that gets straight to the point. Sturdy materials carefully selected for professional use. Durable, waterproof and washable.

Reference : SC703232N

Dimensions : L 70 x H32 x E32 cm

Capacity : 72 L

Color : Black (available depending on quantity)

Weight : 0,800 kg

Characteristics : 1 large compartment closed with a U-shaped zipper ● 2 carrying handles ● 1 shoulder strap ● 1 name tag holder (business card size) ● 1 side slip pocket, and reflective strips

Materials : Body made of double-coated PVC polyester ● handles and edges in polypropylene webbing.

THE TRAVELER'S BAG

Storage range

Shoulder strap : Plastic buckles are positioned at the top to optionally attach an adjustable carrying strap with shoulder pad for added comfort.

Carrying handles : A handle on each side of the bag provides an additional carrying option.

Reflective strip : The bag is equipped with reflective strip all around, making it visible at night and practical to locate in dark place.

Name tag holder : Allows you to insert personal information and also indicate the contents of the bag.

Easy access

Its U-shaped opening provides easy access to the interior. In the blink of an eye, you'll have everything at your fingertips.

72L

Easy and customizable carrying

Its 2 handles and adjustable, detachable shoulder strap provide a quick grip and comfortable shoulder carrying.

Pockets

Interior and side pockets serving as «catch-all» pockets.

SD294515, PG, 6C.

Technical / office backpack

For carrying documents, folders, a PC or tablet with charger, mouse and a few tools.

Multi-compartment

Numerous pockets to organize and store all your equipment.

Compact

Ideal for use on public transport or as carry-on luggage.
Its size allows access on caged ladders.

Reference: SD294515, PG, 6C

Colour: black

Dimensions: L29 x H45 x D15 cm

Empty weight: 1.25kg

Features • 6 compartments • Foam-lined back with 3D mesh • 2 adjustable shoulder straps, foam reinforcement, shoulder carrying + handle between the straps • Gusset for attachment on trolley handle (suitcase or trolley tool bag) and for strap storage when carried as a case • 1 carrying handle, Horizontal "case" carrying • Front fitted with 3 horizontal straps with reflective webbing • 2 Side straps with clasp for tightening.

Materials • 600D Polyester body (Black) • Bottom and lower sides in 2-sided PVC-coated polyester (Black), • Polyamide 210 D PU coated inner lining • Polyester straps • Waterproof 10mm inverted nylon spiral zippers • Zipper pull with retro-reflective cord.

Practical features

- 1** large front gusset pocket, 3-way zippered opening with waterproof zip. Compartmentalized inner pouch with removable semi-rigid partition for tools (tape measure, screwdriver, pliers, cutter, pencils, etc.).
- 2** 1 flat side pocket, straight waterproof zipper, accessible from the side and positioned behind the large flap pocket.
- 3** 1 Rear compartment with side access via waterproof zipper for tablet/PC, mouse and charger. 3-sided foam compartment + 2 removable protective foam pads.
- 4** 1 small top pocket accessible from outside by waterproof zipper and foam lined.
- 5** 1 large central compartment, waterproof zip, padlockable (padlock not supplied), for documents, files... Inner compartment with a large flat pocket and a zippered mesh pocket.
- 6** 1 small gusset pocket on the front, 2-sided opening with waterproof zipper, for small PPE: glasses, gloves, earplugs, etc.

CO452425

MOORING BAG

The CO452425 is a bag with flap offering a large storage volume without compartment inside.

This bag is used to store and protect the material to be stored. It is used on boats as a stuffing bag, to store and protect mooring line, or to store any type of technical equipment requiring protection. It's a light and waterproof bag.

SOLID

Unbreakable design, designed to withstand all equipment loads. Materials that can withstand shocks, acids and moisture.

Reference : CO452425

Dimensions : L45 x H24 x E25 cm

Color : Red

Features: 1 large compartment, Opening by flap with fasteners, 2 carrying handles, 1 reflective strip, 1 shoulder carrying strap, 2 holes in bottom for draining water.

Materials : Semi rigid polyethylene body 18/10ème (Black), Polyester gusset and flap, PVC-coated on both sides (Red), Polypropylène strap and edging, reflective tape.

TOOL BAG - Ref : CO501515N

COATED TOOL BAG

Designed to store long tools such as a torque wrench.

EASY TO HANDLE

Practical design, ideal for carrying a few tools in any conditions.

ULTRA-RESISTANT

Flexible materials designed to withstand all kinds of harsh conditions: impacts, acids, hydrocarbons, and moisture.

Reference : CO501515
Size : L50 x H15 x E 15 cm
Color : Black
Weight : 0,700 kg
Maximum load : 15 kg

Fittings and Layout: : • 1 soft flap closure with 2 fasteners • Rigid side panels • 1 central compartment for tool storage • 1 central hand-carry handle • 2 side hand-carry handles • 1 retroreflective strip at the bottom of the front pocket • 1 adjustable shoulder strap

Materials : • Semi-rigid body made of 18/10 polyethylene (black) • Gusset and flap made of double-sided PVC-coated polyester (black) • Webbing and edging made of polypropylene strap • Brass rivets • Fasteners made of injected polyamide

TOOL BAG FOR SMALL MAINTENANCE OR REPAIR TASKS

The **central handle** positioned on the flap allows you to quickly grab your CO501515 tool bag after closing it.

Retroreflective strip enhances visibility and ensures technician safety.

Adjustable straps

The **shoulder strap** allows you to carry the CO501515 tool bag over the shoulder, keeping your hands free.

Optimized loading

The inner flaps prevent tools from falling out. Reinforced, they allow storage of long and pointed tools.

The flap is flexible and the fasteners are equipped with adjustable straps. The CO501515 tool bag can easily handle tool overload.

Full opening

The flexible flap opens fully, providing a panoramic view inside the bag. You have direct access to all stored tools.

Storage designed for the transport and organization of long tools.

CO2N

MOBILE MAINTENANCE TOOL BAG

Designed like a toolbox, this bag lets you carry a wide selection of tools for all types of maintenance operations.

EASY TO USE

Simple internal layout for organized storage and quick access to your tools.

STRONG AND DURABLE

An unbreakable design built to support any tool load.
Made from materials resistant to impacts, acids, and moisture.

Reference : CO2N
Size : L45 x H24 x E 36 cm
Color : Black
Weight : 1,1 kg
Maximal load : 15 kg

Layout and Features : Flap opening with fasteners • 1 large main compartment • 1 central divider with 1 cartridge holder at the front and 2 pockets at the back • 1 shoulder carrying strap 2 hand-carry handles

Materials : Semi-rigid body made of polyethylene • Gussets, divider, and flap made of 100% recyclable polypropylene • Webbing and edging made of polypropylene • Brass rivets • Fasteners made of injected polyamide

**Have specific requirements?
Our product experts are here to help.**

1 external sleeve for trolley

Adjustable straps

Flexible sides and flap

Retroreflective strip to improve visibility and ensure technician safety.

The shoulder strap allows the bag to be carried over the shoulder, keeping hands free.

12 tool loops and 1 document pocket inside.

Large capacity

The flap opens fully, offering a panoramic view of the interior. Load all your tools easily. The sides and flap are flexible, and the fasteners are fitted with adjustable straps. The CO2 bag easily absorbs tool overloads.

Optimized storage

The internal divider splits the compartment in two to help organize your tools. At the front of the divider: a cartridge holder for storing larger hand tools. At the back of the divider: two flat pockets designed to hold small tools.

Smart carrying design

When open and loaded, the CO2 bag tilts 45° when you grab it by one of its side handles. The flexible sides prevent tools from falling out — a very practical feature during on-site interventions.

ATEX approved

The CO2 tool bag is approved for use in ATEX zones according to the EN ISO 80079-36 standard:

- Gas group IIA: Zones 0, 1, and 2 — compliant with Directive 1999/92/EC
- Dust group: Zones 20, 21, and 22 — compliant with Directive 1999/92/EC

Conformity test performed by INERIS.

750 g

Fabrication française

CO3 Black

CO3 Red

TOOL BAG FOR MOBILE MAINTENANCE

Designed for professionals carrying out small-scale interventions on electrical networks

COMPACT AND EASY TO HANDLE

Lightweight and space-saving, ideal for carrying small equipment to the work site in any conditions.

ORGANIZED

A true tool briefcase: multiple compartments and layouts to keep all equipment neatly stored and easily accessible.

Reference : CO3

Size : L35 x H20 x E 10 cm

Colors : Black or red

Weight : 0,750 kg

Maximum load : 15 kg

Layout : Flap closure with hook-and-loop fastener • 1 central compartment with cartridge holder and 1 pocket • 1 gusseted pocket under the flap • 2 external side pockets with hook-and-loop flap closure • 1 shoulder carrying strap • 1 central hand-carry handle

Materials : Semi-rigid body made of polyethylene • Gussets and flap made of 100% recyclable polypropylene • Strap and edging in polypropylene • Closure system: clasp and hook-and-loop fastener (Velcro®)

Optional : Hook-and-loop strap for belt carrying

**Have specific requirements?
Our product experts are here to help.**

12 internal storage compartments

Compact and well-organized

The flap opens fully, providing immediate access to the central compartment and interior storage areas. A flat front pocket is designed for small documents. Slip your job sheets or RDA into it. Inside the main compartment: 6 cartridge holders to keep each of your hand tools securely in place.

Quickly - accessible tools

With its hook-and-loop fastener, the flap opens and closes quickly and easily. Under the flap, a gusseted front pocket allows for storing small tools. On each side, a closable pocket with hook-and-loop fastening is ideal for isolating a torch or a grease tube.

Practical to carry

The central handle lets you quickly grab your closed CO3 bag. The shoulder strap allows for hands-free carrying.

Optional

Add a hook-and-loop system: ideal for working at height — the shoulder strap converts into a belt for secure and practical carrying.

New

With the new 100% polypropylene cover, our tool bags are now 95% recyclable.

COT301606 Navy blue

COT211105 Navy blue

Tool kit belts

Designed for electricians and technicians who have to work standing up and have tools to hand rather than in pockets.

Compact

Reduced volume and featherweight for carrying just what you need; easily stowed in a large work bag.

Sturdy

Made from durable materials that can withstand pointed tools, shocks, abrasion and moisture.

Reference: COT301606

Colours: navy blue
Dimensions: L30 x H16 x D06 cm
Empty weight : 310 g
Max. load: 4 kg

Reference: COT211105

Colours: navy blue
Dimensions: L21 x H11 x D05 cm
Empty weight : 230 g
Max. load: 2 kg

Features • 1 zip fastener

• 1 rigid tool carrying panel for both references • 1 cartridge belt bungee cord for the COT301606. • 1 belt strap/shoulder strap with fastener: fixed on the COT301606 and detachable on the COT211105.

Materials • polyester body, PVC coated on both sides • rigid polyethylene panel • nylon zip fastener • polypropylene strap and edging • injected polyamide fastener.

Light as a bag, solid as a box

Practical access to tools

The materials are very strong and allow the kit to be opened to 90° for easier tool selection.

Open and select.

On the front: a rigid panel. Remove a few tools to be used or those that you no longer need to look for others easily at the bottom of the bag.

Safe arrangement

COT tool kits are carried round the waist. You no longer have to bend down to pick up your equipment by your feet, it's within reach, not in your pockets, in its dedicated stowage.

Its capacity allows you to carry a selection of tools or special PPE for a given mission. Only carry what you need.

Adaptable carrying options

The belt is adjustable. It can be extended for those who prefer to carry it on the shoulder. It is fixed in the case of COT301606 and detachable on COT211105.

Carried on the belt: ideal for working standing. Buckle up the strap, slide the kit to the desired position: in front of you, behind you, on the right or left. Your hand are free for working.

THIGH TOOL BAG - Ref : COT142807,cuisse

BELT AND THIGH TOOL BAG

Designed for carrying tools during aerial work or when moving around with small tools — and even personal protective equipment (PPE).

COMPACT

Lightweight and space-saving design to carry only the essentials.
Easily fits inside a larger intervention or maintenance bag.

ROBUST

Made from durable materials designed to withstand sharp tools, impacts, abrasion, and moisture.

Reference : COT142807,Cuisse
Size : L14 x H28 x E 07 cm
Color : Marine
Weight : 270 g
Packaging : box of 6 units

Layout and Features : 1 adjustable-height belt loop to attach to trousers, detachable with a snap fastener • 1 adjustable thigh strap • 1 rigid internal divider with straps and bungee cords for tool storage • Flat bungee cords and 4 loops on both inner walls of the bag • 1 external flat pocket • 1 internal elastic flat pocket

Materials : Divider made of 12/10 polypropylene • Fabric made of 100% recyclable polypropylene • Webbing and edging in polypropylene • Zipper closure • Fasteners made of injected polyamide

**Have specific requirements?
Our product experts are here to help.**

BELT AND THIGH TOOL BAG

Easy access to tools

The materials provide good rigidity and ensure a wide opening of the COT bag, making it easy to choose and handle your tools. Interior layout: one removable rigid divider with straps and bungee cords for tool organization.

Ergonomic carrying design

The belt-and-thigh carrying system is ideal for work performed both standing and crouching. Fixed around the thigh, the bag stays securely along the leg, preventing any swinging movement.

Secure layout

The COT thigh bag is worn along the leg, so you no longer have to bend down to pick up tools at your feet. Your equipment stays within reach, stored in a dedicated compartment rather than in your pockets. You can safely carry a selection of tools or specific PPE required for your task.

Two possible attachment options

Can be worn at the waist or on the belt, depending on user preference.

CO2N,BF / CO453626,RL

Light, mobile tool organizer

All the advantages of a tool organizer
with the added benefit of 5kg empty weight

Easy

Simple arrangement to organize
storage and access tools quickly.

Robust

Unbreakable, designed to withstand any equipment load.
Materials to withstand shocks, acid, humidity.

Reference: CO2N,BF

Dimensions: L45 x H24 x E26 cm

Empty weight: 1.3 kg

Features ● 1 soft flap closure with 2 adjustable buckles, ● 1 retro-reflective stripes on the flap, ● 2 tool storage compartments, ● 1 central divider with 10 tool loops at the front and elastic at the rear, ● 1 large flat pocket on the bottom, ● 2 side slots for measuring devices, ● 2 side carrying handles, ● 1 shoulder strap, ● 1 strap with buckle on the back for fixing to the tool organizer trolley CO453626,RL.

Materials ● semi-rigide polyethylene body ● gussets, partition and flap in double-sided PVC-coated polyester ● polypropylene strap and edges ● brass rivets ● injected polyamide buckles.

Reference: CO453626,RL

Dimensions: L45 x H36 x E26 cm

Empty weight: 3.7kg

Features ● flap and buckle closure, ● 1 large compartment for power tools or bulky items with 2 large side pockets for measuring instruments, ● 1 central rigid divider with 9 tool loops on the front and elastic on the back, ● Front panel opening with 2 buckles giving access to 1 tool tray with 13 loops, ● integrated mechanical castors, ● telescopic pull handle, ● the handle can hold a 2nd CO2 bag held by a strap and buckle and resting on the main bag.

Materials ● Body and divider in 18/10th polyethylene (BLACK), ● flap and gussets in 2-sided PVC coated polyester (BLACK), ● polypropylene straps and edging, ● injected polyamide buckles.

MOBILE TOOL ORGANIZER

Maximum storage for minimum weight

🌀 Clever carrying

The tool organizer attaches to the telescopic handle to make the most of the large organizer wheels. Very practical for travelling.

Removable shoulder strap to take only as much as you need to the work site.

🌀 Large interior volume

The wheeled organizer has plenty of space to store all your tools, even the largest.

🌀 Two organizers for twice the storage space

A removable tool organizer that attaches along to the telescopic handle of the trolley organizer containing:

- ▶ 2 compartments, tool loops, 2 slots
- ▶ shoulder strap and handles to release when needed (rough terrain, stairs, hard to reach or confined spaces, etc.)

A large tool organizer on wheels containing:

- ▶ one compartment for electrical hand tools and heavy equipment with two equipment slots
- ▶ an organized storage area with tool loops and a compartment for documents or a tablet with optional protective padding.

Even with the tool organizer on top, you can access tools in the trolley organizer by opening down the front panel.

Bag for working at height

Designed for working at height or in a hazardous environment

Simple

Very compact and lightweight for carrying over the shoulder, on the belt or on a harness.

Efficient

Manufactured using extremely strong materials, suitable for carrying equipment under difficult conditions.

Reference: CO8

Colours:

Dimensions: L37 x H21 x D10 cm

Empty weight: 610 g

Max. load: 15 kg

Features • 1 central compartment with 4 tool stowage cavities • 1 front pocket with flap and Velcro fastener • 2 open side pockets • 3 carrying solutions with a Velcro system: for securing to the belt, cartridge holder or harness.

Materials • semi-rigid polyethylene body • polyester fabric, PVC-coated on both sides • polypropylene strap and edging • brass rivets • injected polyamide fasteners.

BAG FOR WORKING AT HEIGHT

Light as a bag, solid as a box

Practical fittings

An open compartment with a tool stowage cavity at each corner, two side pockets and a front pocket. A simple solution allowing you to find your tools with your eyes closed.

The side pockets are reinforced to ensure that they stay fully open. Practical for stowing and grabbing equipment with one hand.

The front pocket closes by means of a flap with Velcro fastener. Save time in total safety.

Carrying options

The strap is detachable and can be transformed, as required, into a belt or shoulder strap. With two adjustable Velcro strips, you can choose how to carry your bag.

1st option: carrying on the belt, ideal for working at height. Climb with your hand free.

2nd option: carrying on the shoulder strap, so that the bag is on the shoulder.

3rd option: attach your bag directly to your working harness. The depth is ideal for easy grasping of your tools and for your safety.

Weight :

Colour: dark grey, Other colours on request: black, light grey, navy, blue, turquoise, brown, red, orange, burgundy, pink, dark green, green, light green, yellow, dark beige.
Marking on request

Features: - Flap and zipper closure on 3 sides with 2 sliders,
- 1 label holder for external loading on the flap (outer dimension 95 x 70 mm and inner dimension 75 x 50 mm),
- 1 carrying handle,
- 1 inner pocket under the flap for cold pack (cold pack not included).

Materials: - Body in PVC-coated polyamide on one side (DARK GREY),
- inner lining in PEVA (WHITE),
- Insulating foam inserted in the lining, 2 layers of 3 mm, i.e. 6 mm in total,
- inner pocket in crystal clear PVC with PVC-coated polyester reinforcement strip on both sides (BLACK),
- Finished with a polypropylene strap border (BLACK).

ZULUPACK BAGS

WATERPROOF AND RESISTANT BAGS

From left to right: Tube 45, Triton 25, Nomad 35, Nomad 60, Barracuda 138

Proven resistance

Being made with high frequency welding, the Zulupack bags are guaranteed to be waterproof, sandproof and mudproof. PVC coated nylon 420D is used to ensure the bags can resist being ripped, damaged by friction and even resist the cold (until -15°C / 5°F).

Practical et comfortable

Zulupack bags are designed to make its owner's life easier. The numerous outer pockets and the multiple inner storage space allow you to keep all your belongings with you.

Like every work tool, you should never be reluctant to use your bag. The thermoformed back and straps ensure optimal comfort. The straps are covered in lycra to avoid them being wet from water absorption.

Adapted closing system

The winding closing system makes so that your bag is completely waterproof. If the upper part of the bag is wrapped 3 to 4 times, your bag can safely be put in contact with water, sand, mud... And its content will be protected.

L-shaped fender : Ref : PBL404010,L25,GL

THE L-SHAPED FENDER

The L-shaped fender is ideal for protecting boats with low freeboards and/or without guardrails, such as classic sailboats or sportboats.

Drawing on several decades of experience in protecting the most delicate and high-performance boats, our new L-shaped model is designed to preserve even the finest varnishes and paints.

STRONG, LIGHTWEIGHT, AND EASY TO STORE

Made from ultra-resistant materials, designed to withstand pulling forces, impacts, punctures, seawater, hydrocarbons, and UV exposure.

QUALITY AT THE BEST PRICE

This fender is the result of our expertise, our design methods, our passion for innovation, and our commitment to providing you with high-quality products made in France.

Reference : PBL404010,L25,GL

Color : Grey

Size : L40 x H40 x E10 cm

Weight : 1.23kg

Layout and Features : Foam fender inserted into an L-shaped cover
• “Textile” face on the hull side to promote protection and smooth contact

Materials : PE foam (30 kg/m³) • Double-sided PVC-coated polyester cover (650 g/m²) • Hull-side faces made of single-sided PVC-coated polyester fabric (500 g/m²) • Polypropylene webbing attachment loop • 6 mm nylon spiral zipper (without slider)

Available in 3 models : PB244610 (Navy Blue/ White / Grey) - PB405510 (Navy Blue/ White / Grey) - PB405520 (Grey)

FENDERS

Developed over 10 years for offshore racing yachts, our flat fenders stay in place against the hull. They protect the paint and decorations on fragile hulls.

SOLID, LIGHT AND EASY TO STORE

Made from ultra-durable materials, designed to withstand forces: tearing, impact, punctures, sea water, oil, UV etc... It can even be used as a step or cushion.

QUALITY AT THE BEST PRICE

These new fenders are the result of our experience, our design methods, our taste for innovation and our commitment to serve you with products manufactured in France.

NEW: THE THICKER FENDER!

A greater thickness for larger units. The ideal fender for the layout along the hull which often requires to have different references of thicknesses.

THE ORIGINAL
CREATION

ESR27350,11E,TA

ES27295,9E,TA

RESCUE RE-BOARDING LADDER

Easy to install and easy to use,
Magic-Reboard is designed to reboard unaided in complete security.

CONFORMITY & ADAPTABILITY

In conformity with the norme EN/ISO 15085 and the european directive 94/25/CE,
It adapts to all types and sizes of boats.
Easy to install, cow hitch the reboarding ladder around the stern rail.

SIMPLICITY & RELIABILITY

Easy to install on the side of the stern rail, its operation is sure and safe :

- the small line when pulled opens the box to deploy the ladder completely,
- once deployed at least three steps are in the water,
- the steps are wide and reinforced to facilitate climbing back aboard.

Reference : ES27295,9E,TA
Box dimensions : L27 x H17 x E05 cm
Ladder dimensions : L25 x H295 cm
Number of steps : 9
Color : white and black
Weight : 1.1 Kg

Reference : ESR27350,11E,TA
Box dimensions : L27 x H25 x E06 cm
Ladder dimensions : L25 x H350 cm
Number of steps : 11
Color : white and black
Weight : 1.8Kg

Features : Installation by cow hitch around the stern rail, box closed by flap and press studs, fluorescent band, opening with small line, ladder with 9 or 11 steps depending on model, 2nd floap at the back of the box closed by inox screw and nut.

Materials : ladder in polyester weaving, semi-rigid or rigid reinforcement (depending on model) in polyethylen, box in PVC coated polyester double sides, back in polyethylene.

ES27295 : reinforcement in polyethylen 1.8 mm thickness

ESR27350 : rigid rungs made of 2 acrylic rings in a strap sheath

How to install ?

How to use ?

SIMPLE TO INSTALL AND TO REMOVE FOR WINTER

The rescue ladder is installed around the stern rail by cow hitch.

Easy to install it also allows for quick removal for winter storage.

RELIABLE USE

The small line allows the ladder to be opened unaided from the water. The ladder unfolds automatically.

REBOARD EASILY

The length of the ladder is adapted for most boats on the market today.

The steps of the ladder have been specially designed to sink in the water.

In order to easily reboard, there should be 3 steps in the water. Reboarding is facilitated with wide steps to allow both feet on the steps at the same time and reasonable distance between the steps to make climbing easier.

FOR MORE SECURITY AND VISIBILITY:

- ▶ A new reflective tape (SOLAS Norm)
- ▶ The rope with reflective thread
- ▶ and directly attached to the ladder to create an adequate lifeline allowing to hang on and get closer to the ladder when the boat is moving.

EMERGENCY LADDER **MAGIC-REBOARD®**

Pontoon

ESR27190,6E,2BC,2O

PONTOON EMERGENCY LADDER

Designed for ascent on pontoons independently and safely, its use is simple and functional. Its positioning is easily noticeable for users thanks to its orange color and retro-reflective band, and also for people on the pontoon, thanks to the rigid plate with the same features.

CONFORMITY & ADAPTABILITY

In compliance with the original model of the emergency boarding ladder (EN/ISO 15085 and European Directive 2013/53/EU), this product is suitable for various types of pontoons.

SIMPLICITY AND RELIABILITY

Thanks to the simplicity of its design and assembly, the pontoon emergency ladder is simple and safe to operate:

- The cord is activated from the water and triggers the deployment of the ladder,
- When fully deployed, at least 4 rungs extend into the water (1.20 m),
 - Ideally placed in front of a pontoon float,
 - The wide and rigid rungs facilitate the ascent,
- The pontoon is free of any mooring lines, electric cables, etc.

Référence : ESR27190,6E,2BC,2O

Dimensions :

Box dimensions : L41 x H49 x E10,5 cm

Ladder dimensions : L27 x H190 cm

Number of steps : 6

Color : Orange

Features: Attachment to the pontoon rails using stainless steel eyelets over the rigid identification plate, close to a cleat and above a pontoon float, handle offset from the pontoon to facilitate ascent, carrying cases gaping opening, closing by flap and press studs, retro-reflecting band, release by cord.

Materials: Ladder in polyester strap with rigid reinforcement, case in high resistance polyester coated with PVC on both sides, back in polyethylene and edge in reflective polypropylene strap, stainless steel eyelets diam 14mm

HP1003

GUARD LINE PROTECTIONS

Guard line protection received specific arrangements to increase its lifespan and its ability to secure :

- Inner spiral tube to protect from potential cuts,
- High density foam,
- Closing with lacing system on both sides.

Reference : HP1003

Dimensions : L100 x D3,5 cm

Color : White

Weight: 0,25 kg

Features : Foam tube, closure by velcro, Closing with lacing system on both sides, Inner spiral tube to protect from potential cuts.

Materials : Body in high resistance polyester coated PVC 2 sides (WHITE), , polyethylene foam tube, spirale tube en PVC, border in polypropylene webbing.

RHP1140

MOORING LINE PROTECTION

For a good protection against chafing, an EVA foam lining is sewn inside the PVC coated polyester on both sides.

It also allows, when carefully wrapped up and tightened up with velcro strips all along, to stay in position.

Reference : RHP1140

Dimensions : L11,5 x H 40 cm

Colour : White

Weight : 0,25 kg

Features : Velcro closure, interior lined with foam.

Materials : Body in high resistance polyester coated PVC 2 sides (WHITE), Foam EVA Ep. 2 mm, border in polypropylene webbing.

HP1745

TURNBUCKLE PROTECTIONS

In addition to aesthetic aspect brought, your turnbuckle will be protected from the salty winds of sea and your sheet from your piston pin.

It sets up with a strap that you set under the chainplate and a velcro strap all along the protection.

Reference :HP1745

Dimensions : L17 x H45 cm

Color : White

Weight : 0,25 kg

Features : Closure by Velcro

Materials : Body in high resistance polyester coated PVC 2 sides (WHITE) Fixing system and border in polypropylene webbing.

The Magic Mast ladder is the easiest way to go aloft by yourself. The alternating steps and the «platform» at the top, reinforced with polyethylene, provides comfort and safety.

The Magic Mast ladder is available in length of 3,7 or 9 meters and comes in a large bag. It is designed to be extended (2,3 and 3 meters) and thus adapts to the height of your mast.

You can do all the work on your mast, change lights, work on spreaders, set a weathervane, with the additional equipment : work harness and fall protection.

TIPS FOR USING MAGIC-MAT®

Attach the mainsail, spinnaker or genoa halyard to the eye at the top of the mast ladder (the side where there are two steps facing).
Hoist the halyard with the mast ladder.
Remove the twists.

Attach the eye at the bottom to the gooseneck or a fitting on the mast.
Tension the halyard.
To climb :

- hands around the mast,
- feet against the mast, push your body against your feet, once to the right and once to the left and so on. This requires a slight rotation of the body around the mast.

When the right foot pushes on the mast, you're on the right side of the mast, when the left foot pushes on the mast you're on the left side of the mast.

At the masthead, wedge your feet in the steps, your back is supported by the harness, and both your hands are free to work.

Your arms do not get tired as you're above your «work».

Two complementary and essential accessories bring you the best security for working alone : the work harness and the fall protection.

The fall protection is secured between a halyard and the harness : it limits your fall to 80 cm during your ascent and descent.

This package allows you to sit in the harness as well as relax during your ascent and descent.

Flash this code to see the video..

To choose the combination of mast ladder and extension necessary for your boat, you need the distance between the boom and the mast head (this distance corresponds to the «P»)

P= 30 m = 1 mast ladder of 9 m + 3 extensions of 7 m
P= 26 m = 1 mast ladder of 9 m + 2 extensions of 7 m + 1 extension of 3 m
P= 25 m = 1 mast ladder of 9 m + 2 extensions of 7 m + 1 extension of 2 m
P= 24 m = 1 mast ladder of 9 m + 1 extension of 7 m + 2 extensions of 3 m + 1 extension of 2 m
P= 23 m = 1 mast ladder of 9 m + 2 extensions of 7 m
P= 22 m = 1 mast ladder of 9 m + 1 extension of 7 m + 2 extensions of 3 m
P= 21 m = 1 mast ladder of 9 m + 1 extension of 7 m + 1 extension of 3 m + 1 extension of 2 m
P= 20 m = 1 mast ladder of 9 m + 1 extension of 7 m + 2 extensions of 2 m
P= 19 m = 1 mast ladder of 9 m + 1 extension of 7 m + 1 extension of 3 m
P= 18 m = 1 mast ladder of 9 m + 1 extension of 7 m + 1 extension of 2 m

P= 17 m = 1 mast ladder of 7 m + 1 extension of 7 m + 1 extension of 3 m
P= 16 m = 1 mast ladder of 9 m + 1 extension of 7 m
P= 15 m = 1 mast ladder of 9 m + 2 extensions of 3 m
P= 14 m = 1 mast ladder of 9 m + 1 extension of 3 m + 1 extension of 2 m
P= 13 m = 1 mast ladder of 9 m + 2 extensions of 2 m
P= 12 m = 1 mast ladder of 9 m + 1 extension of 3 m
P= 11 m = 1 mast ladder of 9 m + 1 extension of 2 m
P= 10 m = 1 mast ladder of 7 m + 1 extension of 3 m
P= 9 m = 1 mast ladder of 9 m
P= 8 m = 1 mast ladder of 3 m + 1 extension of 3 m + 1 extension of 2 m

Anti Falling

Work Harness

SECURITY PACK ANTI-FALLING AND WORK HARNESS

Developed and adapted for your security when you climb aloft alone with you mast ladder.

ERGONOMIC AND EFFICIENT

This security set is indispensable. It allows you to rest while climbing, to reach the spreader tips...

EASY INSTALLATION

Made with resistant materials which can easily withstand the marine environment.

Anti-Falling

Reference : AC

Weight: 0.162 kg

Caractéristiques : Anti-chute made of aluminium

Work Harness

Reference : HW

Weight: 0.75 kg

Caractéristiques : Body made of polyethylene foam recovered with polyester. Polypropylene webbing, loops in polyamide carabiner in stainless steel.

SECURITY PACK

ANTI-FALLING AND WORK HARNESS

A subtle marriage between a harness and a bosons chair, the work harness complements the mast ladder.

It allows you to work standing on the platform at the top of the mast ladder, resting on your two feet, back supported by the wide belt. The long tether around the mast will allow you to adjust your position.

The belt will allow you to sit and work suspended by a halyard and the anti-fall blocker. So you can reach the ends of the spreaders, or come down the back or head stay, for comfort and for you to rest.

This accessory, original for mountaineering, brings you 100% safety. However take care after each use to store it in its cover and preferably in the chart table.

Easy to use, it is used on a free halyard, or a spare line that is hoisted with the mast ladder.

During your ascent, the anti-falling accompanies you and instantly retains you in the case of a problem.

To come down, the security level system will force you to think of a simple gesture, to follow it down.

FIRST AID BAG

Created and designed to accommodate regulatory products (RSO) from shipboard pharmacies.

APPLICATION

The first aid kit can be used in other fields of activity than boating. Can be integrated into the Matos 60, possibility to put two of them.

ORGANISED STORAGE

equipped with a list holder under the flap for prescriptions and product uses. On the top, a label holder to indicate the product stored.

Several compartments available to store all types of products (creams, disinfectants, etc.).

Reference : SC282428,2CE,6C

Dimensions : L28 x H24 x E 28 cm

Color : Red

Features : 1 large compartment, total opening by flap in 1 piece, closure by 2 zippers and velcro, 2 carrying handles, 1 transparent pocket under the flap, 1 label holder for external loading on the flap (dim. Ext. 210 x 150 mm and dim. Int. 180x120 mm)

Materials : Body, gussets and flap polyester endued PVC 2 faces fabric on both sides, reflective webbing border, 30mm polypropylene webbing handles, 6mm injected zipper

BAB'So
- FIRST -

**SAFETY - SURVIVAL
PSYCHOLOGICAL SUPPORT**
My link with life! Because every second saved is a victory over the situation.

BAB'So
BENEFICIAL-ALERT-BEACON®

HOLD ON

BE RECOGNIZED

What is in the Bab'So?

Identical equipment on both sides

FLAG MY DISTRESS

SPOT THE OTHERS

BAB'So FIRST new safety, survival and moral support equipment unique in the world

LOST IN NATURE OR VICTIM OF AN ACCIDENT, WHAT DO I NEED?

BAB'So FIRST meets the 4 ESSENTIAL NEEDS FOR A SAFE RESCUE:

- 1 - hold on: a reliable presence to keep your confidence and hope up - stay active while waiting for help - protect yourself from the heat or cold - stay safe with a 150 kg traction link - reassuring, completely autonomous, no need for subscription, batteries or phone network, reusable
- 2 - be seen by increasing your visibility day and night, on land or at sea
- 3 - be heard with a whistle suitable for short, rapid breath
- 4 - be recognized with medical and personal identification bands

This is the only equipment that acts as a catalyst to trigger your survival instincts by building up confidence and hope.

By allowing you to remain active in the event of an accident, BAB'So FIRST increases survivability, rescue speed and saves more lives.

What makes it unique ?

When an accident happens, the victim must be able to stay calm to be able to hold on, stay safe and signal their presence.

With no electronics and able to operate anywhere in the world, BAB'So FIRST is completely reliable.

It is suitable for everyone and for all natural environments.

BAB'So FIRST increases your ability to survive while awaiting rescue.

BAB'So FIRST is more than just technical assistance, it provides moral support making you an actor in your own rescue.

It's your lifeline

BAB'So
- FIRST -

BAB'So
BENEFICIAL-ALERT-BEACON®

BE HEARD

BE RECOGNIZED

An accident: be an actor in your survival

Within seconds of an accident, everything can change.
You enter a sort of bubble.

Your brain has 3 areas that are always working together: the reptilian brain, the emotional brain and the rational brain.

The reptilian brain governs your safety and survival.

It has only three abilities: 1 - attack, 2 - flee, 3 - freeze. Therefore, it must be active to keep you alive.

Whatever your training, preparation or equipment, at the moment of the accident, a conflict will play out in your brain. Faced with stress, the emotional and rational parts of your brain will induce panic, doubt and despair, which block the reptilian brain. If the reptilian brain is paralyzed, your survival instinct won't kick in.

BAB'So is designed to act as a catalyst for your reptilian brain by providing it with a reliable presence, to maintain the confidence and hope it needs.

- BAB'So FIRST cannot fail: it needs no electronics, no network, no subscription, no batteries, and is made of ultra-resistant materials
- Versatile and instinctive, its use keeps you active.

When the reptilian part of the brain is confident, it triggers your survival instinct and reveals the superhero that is already in each of us, just like all those ordinary people who found extraordinary resources to get out of a hazardous situation.

Being a BAB'So carrier also means being able to reassure and assist anyone in distress.

Thanks to its design and unfailing reliability, BAB'So meets the 4 essential needs for a rapid rescue:
