www.outils-oceans.com

You are a boater, a nautical professional, an offshore racer, a boat builder, a dealer: storage, protection, comfort, and safety on board are at the heart of your concerns.

Anchoring Rigging Mast Safety on board
 Marine Sailboats Motorboat Rigid inflatable boat
 Yachting Navigation Offshore racing
 Emergency Ladder Mast ladder
 Drisse Bouts Storage Rope bags
 Construction Protection Hull Bow Equipment
 Potoon Fender

We share with you common goals that drive us every day :

- Optimize on-board storage
- Protecting you boat equipment and people
- Improving comfort on board
- Safe sailing

Much more than accessories, our textile and semi-rigid equipment contribute to achieving these goals.

Outils Océans was founded in 1987 by Vianney ANCELLIN, a former ocean racer, to meet the need for a "sailor's toolbox". This is how the first Outils Océans bags travelled the world, thanks to renowned sailors.

The result of ocean racing experience, Outils Océans equipment follows you everywhere and for a long time !

The ocean is a vast space, not always welcoming, but it opens the mind. It shapes the character of those who dare to cross it by developing their discipline, endurance, and ingenuity. Outils Océans cultivates this heritage to create robust and clever products.

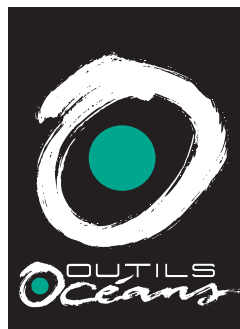

Our business is the study, design and manufacturing of textile and semi-rigid equipment designed to store, transport and protect all types of objects or documents.

Innovation is the driving force behind Outils Océans' development. We are constantly pushing back the boundaries to offer maximum functionality, quality and durability, with minimum material, energy and weight. We regularly integrate new materials and design new products that we first test in extreme conditions before making them more widely available to boat builders and boaters. Some of our creations are registered designs.

We are fully committed to the values of sustainable development and corporate social responsibility, from design to end-of-life equipment processing.

Our greatest pride is the long-term relationship of trust that we build and maintain with you.

You can be sure of the commitment of our team of over 30 employees to your complete satisfaction.

The history of our marine equipment

Our concept is based on 3 key elements

Ergonomics

- Lightweight when empty
- Ease of use

Sturdiness

- Deformable and unbreakable materials
- Resistance to agressions: corrosion, UV, waterproofing...

Efficiency and innovation

- Materials and design approved in offshore racing
- Development of products that make sailing and life on board easier

A unique and sustainable design

Semi-rigid frame

Thermoformed, with shape memory
Assembled to flexible materials directly by stitching

Reinforcing rod

To always maintain the shape of the opening according to the model.

Fastening system

Quick with mushroom and locking slat system

Aesthetic

Opaque or perforated fabric depending on the model.

The lifespan of our products is 5 to 8 years depending on usage.

Outils Océans is a **Breton SME** with over 30 employees, located in Finistère at La Forêt-Fouesnant, where our head office and manufacturing workshop are located.

DESIGN, CONCEPTION, AND MANUFACTURING SINCE 1987

A well-structured, well-equipped design office, constantly on the lookout for new developments

Our design office optimises :

- ▶ working methods
- ▶ the ergonomics of workstations and tools
- ▶ the use of materials and accessories

Equipped with design and drawing software, it designs the equipment and supervises their production.

▶ It takes into account **sustainable development** from the design phase to the end of the product's life :

- ▶ Minimising the consumption of materials and resources
- ▶ Maximising functions
- ▶ Research and Development: materials, technologies, know-how
- ▶ Maximize the lifespan
- ▶ Maintaining existing equipment
- ▶ Managing end-of-life products

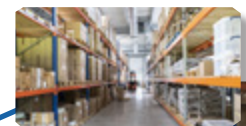

Modern, well-maintained technical resources

We moved to new premises in 2021, spanning 2400 m², offering organized spaces and a comfortable working environment.

We have

- ▶ Cutting workshop equipped with presses, thermoforming machine, automatic cutting table
- ▶ Manufacturing workshop equipped with ultrasonic and high-frequency welders, sewing robots, sewing machines (flat, cylindrical, edging), and a range of machines for attaching accessories
- ▶ Prototyping workshop equipped with a cutting table, a sewing machine, including one with an extended arm

Manufacturing workshop

Storage

Cutting workshop

Administrative
departement

Controlling manufacturing quality, prices and deadlines

Whatever your requirements, we have the necessary production capabilities to deliver your orders in large or small quantities, within the shortest possible timeframes, at very competitive prices, with rigorous quality control.

PEOPLE ARE AT THE HEART OF OUTILS OCEANS' FOUNDING VALUES

This is reflected in all our relationships: whether externally with our client and supplier partners... but also and above all internally with our employees.

To be a customer is also to come on board with us & become a member of the Outils Océans crew!

You are at the center of our concerns. Beyond our contractual relationships, we maintain a real partnership with you over time. In our approach, we prioritize diagnosis and advice, followed by work methods before proposing solutions and equipment.

We are committed to contributing to the **maintenance of industrial employment in France:**

- By offering you French manufacturing whenever possible,
- By promoting our production workshop and its associated services (responsiveness, quality, after-sales service, etc.).

The Management of Outils Océans has developed a sustainable development and CSR charter since taking office in 2012. This charter fully aligns with the company's values and leads to concrete actions every year.

We are delighted to share with you our four main commitments, illustrated by our actions, and to provide you with the benefits of CSR.

Outils Océans is committed

1 Designing and providing sustainable products

OUR ACTIONS

AT OUTILS OCÉANS

- ▶ Versatile products that will stand the test of time
- ▶ After-sales service / repair / deconstruction / recycling
- ▶ ESAT partnership

Let's go further together!

Entretien et traitement la fin de vie des produits

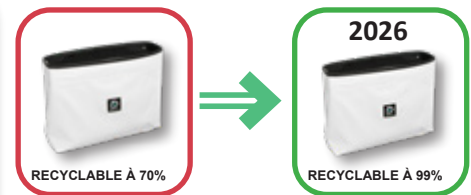

2 Managing resources

OUR ACTIONS

AT OUTILS OCÉANS

- ▶ Eco-design: choosing less polluting and recyclable materials, optimising cutting plans, reusing and recycling offcuts
- ▶ Example of 100% recyclable polypropylene fabric > elimination of PVC and recyclability
- ▶ Internal projects: internal use of the Elise EDM, distribution of water bottles for refilling at water coolers and cups for use at the beverage dispenser..., new premises with solar energy production, charging stations for electric vehicles, renewal of our vehicle fleet (plug-in hybrids)
- ▶ Grouping of our supplies and maritime freight in case of import

Recyclability of our rope bags

3 Maintaining a genuine partnership with customers, suppliers and partners

OUR ACTIONS

AT OUTILS OCÉANS

- ▶ Advice and personalised follow-up
- ▶ Guaranteed compliance: with commitments, environmental standards and social standards
- ▶ Outils Océans has been a member of the "United Nations Global Compact" since 2013
- ▶ Continuous improvement of working conditions: ergonomic workstations (gallows, automatic cutters, tool carts, etc.)
- ▶ Transparency for customers

Your CSR benefits in choosing Outils Océans

- Optimisation of ownership and operating costs
- Recyclability of products and actual recycling at end of life
- Compliance with specifications and commitments
- Environmental and social compliance
- Improved working conditions for users
- Innovative solutions
- Made in France

4 Help maintain industrial jobs in France and contribute to local life

OUR ACTIONS

AT OUTILS OCÉANS

- ▶ Priority to French manufacturing as long as economic constraints allow
- ▶ Desire to maintain technical expertise and our ability to innovate
- ▶ Support for local associations: Entreprendre Bretagne Network, Finistère Offshore Racing Hub, Figaro-Bénéteau Class

The main sectors of activity of our clients/users?

The uses of our products

Our professional approach

CLASSIC RANGE

OPEN ROPE POCKETS

Flash this code to watch the video

The open rope bags - also named Bayabouts by our company - have been developed to stow lines (halyards, sheets...) flaked and ready to run. Their installation is quick and easy. They can be removed when the boat is in ort for easy cleaning and winter storage.

Outils Océans' "bayabouts" are waterproof and UV-resistant. Developed in collaboration with offshore racers, they have proven their reliability in ocean racing around the world.

All three models are made from 100% recyclable fabric.

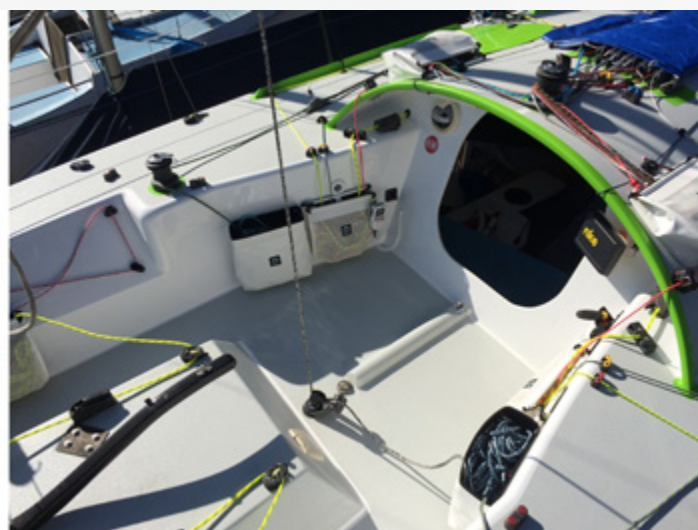

100% recyclable fabric
*non toxic

Ref. T303110 - Dim. L30 x H31 x D10 cm

Ref. T222508 - Dim. L22 x H25 x D08 cm

CLOSED ROPE POCKETS

Flash this code to watch the video

The closed rope bags have been developed to stow lines coiled.

Once the line is coiled, pull the front of the rope bag to open, slide the coil inside. The rope bag closes automatically.

No matter what the conditions are the line is always there.

Pull, stow and let go. It's shut!

All the Outils Ocean rope bags have our quick fixation system, which allows for easy installation and removal.

Resistant to UV rays and weather conditions.

CLASSIC RANGE

OUTDOOR STORAGE

WINCH HANDLE HOLDERS

The Outils Oceans winch handle holders have one or two inclined cut-outs on the upper part to allow the winch handle to always be arranged against the boat. The winch handle holder with 2 cut-outs is universal, allowing it to be stored in all cases, to the left or to the right.

The pair of winch handle holders, clockwise rotation (left) and anticlockwise rotation (right), let you choose the direction the winch handle will be stored - to the right or to the left - in respect to winch or a bulk head. The pair allows you to choose the direction of rotation in relation to an object (bitt, bulkhead, door) and the location of the winch.

100% recyclable fabric
*non toxic

Unit - Both directions of rotation
Ref. RMW2 - Dim. L10 x H33 x D 07 cm

Pair - 1 clockwise, 1 anticlockwise rotation
Ref. RMWRARH - Dim. L10 x H33 x D07 cm

BOTTLE HANDLER

The bottle handler - or "bayabouteille" as we call it - adjusts to the shape of a flask or bottle and keeps it securely in place, whatever the heeling angle.

Its light colour helps prevent overheating. Both lightweight and durable, it is made from materials selected for their resistance to weather and UV exposure.

100% recyclable fabric
*non toxic

Ref. RMB - Dim. L10 x H25 x D10 cm

STORAGE LOCKER

The Outils Oceans storage lockers, with one compartments and clear window, are easy to install.

This locker allows you to store your personal items such as binoculars, sunscreen, keys, glasses, as well as A4-sized documents (magazines, instructions).

Ref. T161906 - Dim. L16 x H19 x D06 cm
Ref. PP332508 - Dim. L33 x H25 x D08 cm

RACING RANGE

ROPE BAGS

The Outils Océans **Racing range** meets the highest performance standards for **strength and lightness**.

The design protects the ropes while ensuring **efficient water drainage and fast drying**.

They **retain their shape** thanks to reinforced openings.

Strong and durable, each product has been tested on **various offshore racing boats**.

- Ref. **T403110,Racing** - Dim.L40 x H31 x D10 cm
- Ref. **T303110,Racing** - Dim.L30 x H31 x D10 cm

- Ref. **T161906,RB,Racing** - Dim.L16 x H19 x D06 cm

Ingenious : the small model with velcro closing : protect and organize your ropes, but also your little things (sunglasses, suntan lotion, keys, phone...)

WINCH HANDLE & BOTTLE HOLDER

Winch handle holders and water bottle holder also exist in racing version with a lighter and perforated raw material.

- Ref. **RMB,Racing** - Dim.L10 x H25 x D10 cm
- Ref. **RMWRARH,Racing** - Dim. L10 x H35 x D07 cm

3 COMPARTMENTS SOFT STORAGE LOCKER

The 3 compartments soft storage locker has been created and adapted for various uses whether you are on a sailboat, a RIB, a fishing trip or simply inside a locker.

Practical, thanks to its two flap pockets on the upper part and a long pocket without gusset on the lower part allowing to store any kind of material (rope, fin, gaff, oar, fishing material...).

Easily removable, thanks to its hooking system by mushroom or by lashing with the help of available buckles. The flexible equipment can follow you in all your movements with all your material, ready to be used.

Line up several of them and easily modulate your storage.

Flash this code to watch the video

Ref. **TM804010,3C,2RB** - Dim. L80 x H40 x D10 cm

1 COMPARTMENT & FLAP STORAGE LOCKERS

The Outils Oceans flap equipment is easy to install thanks to the quick-fit system.

These toolboxes are designed mainly for outdoor use but are also welcome indoors.

Ideal for motorboat consoles, semi-rigid, they allow to store while being protected from the sea spray.

Made from 100% recyclable materials.

Ref. **PP332508,RB** - Dim. L33 x H25 x D08 cm

Ref. **T161906,RB** - Dim. L16 x H19 x D06cm

ON-BOARD COMFORT RANGE

LEE CLOTH

The lee cloth Outils Oceans was designed to fit different sized bunks with 3 attachment loops on top on each side.

It is held down by two attachment loops and has a reinforced bottom that folds under the bunk and fixed by screws.

The material has openings for air flow and reinforcements ensure great strength and durability.

Ref. **TM17073** - Dim. L170 x H73 cm

LUNCH BOX

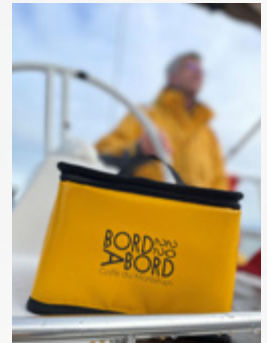

Ref. **SI231520,CE,PP**
Dim. L23 x H15 x D20 cm

The isothermal Lunch Box made in France by Outils Océans You can carry your meals (cans, bottle of water, cutlery, etc.) and keep them fresh at the same time, thanks to its compartment for cold packs and its insulating foam.

Practical and safe, it's easy to wash.

Other colours and logo customisation options are also available.

STORAGE LOCKERS

The Outils Oceans storage lockers, with either one or two compartments and clear windows, are easy to install.

The new locker with 2 compartments is modular and can be fixed one to another either vertically or horizontally to create your own custom storage lockers. Everything is organized and easy to find: one side for little things (suntan lotion, sunglasses, keys...), one side for larger objects (water bottle, A4 documents...).

Dim. L33 x H25 x D08 cm

Ref. **EQ5535,2C**
Dim. Petit compartiment L16 x H20 x D08 cm
Grand compartiment L30 x H20 x D08 cm

CARRIER BAG

This bag, large and robust will become indispensable for carrying all types of dry or wet equipment, whether on land or at sea (personal effects, racing, beach or leisure equipment).

Ref. **VO353215,AN**
Dim. L35 x H32 x D15 cm

STORAGE LOCKERS

Discover our new range of interior lockers. Its design and mottled fabric add a touch of modernity to your interior fittings.

Lightweight and strong, with 100% recyclable fabric treated against UV rays and moisture...

With the mushroom fastening system, it will be easy for you to remove them for cleaning, maintenance..."

Add a touch of style and practicality to your interior!

This locker is dedicated to all types of storage but also ideal for use as a bathroom trash can, for example.

Easy to use thanks to its open volume, it has a Velcro flap to prevent objects from falling out.

Ref. PP182511,RV,I - Dim. L18 x H25 x D11 cm

Use this versatile storage unit for your documents, magazines or as a pocket divider. Compact and open, it fits easily into any space, such as a cabin or chart table.

Ref. PP332508,JC,I - Dim. L33 x H25 x D08 cm

Use this storage unit for your pencils, compasses, glasses or to keep a bedside book and telephone close to you. Compact and open, it fits easily into any corner.

Ref. PP251105,I - Dim. L25 x H11 x D05 cm

Ideal for storing your bottles, whether water, oil, or any other galley or cabin container. Elegant and practical, it ensures your bottles stay securely in place, even under heavy heel. Lightweight yet robust, it is made from 100% recyclable fabric, resistant to UV and moisture.

Ref. RMB,I - Dim. L10 x H25 x D10 cm

The Outils Océans VHF holder is designed to provide a practical, elegant, and secure onboard storage solution for your VHF radio. Made from durable fabric with reinforced edges, it effectively protects your equipment while ensuring quick access in case of emergency or manoeuvre.

Ref. PP101505,I - Dim. L10 x H15 x D05 cm

The Bayaphone holds and protects onboard smartphones, even in the toughest conditions.

This ensures that phones remain accessible, usable and secure at all times. Lightweight, practical, and reliable, the Bayaphone is designed for life at sea. It protects what has become both an essential safety device and a valuable personal belonging.

Ref. PP111804,2C,SW - Dim. L11 x H18 x D04 cm

EQUIPMENT STORAGE RANGE

STACKING BAGS

THE MUST-HAVE OF
A BOX & A BAG

The «Matos» is an exclusive Outils Océans, designed in collaboration with the greatest skippers, for stacking gear. The best of a case and a bag, it is solid and structured to carry heavy equipment (anchor, tools, deck hardware, jerry cans...).

Lightweight and foldable, it saves space by compressing to limit the volume used. The design and materials allow the bag to be loaded without limit, except of course that the user must carry! 2 half-flaps open with one hand for direct access to the content even in a small space. There is a clear pocket to list the contents in order to find everything easily. The small cords allow the bag to be compressed or carried in different ways. The optional interior bags allow for compartmentalizing.

In option it receives 1 or 2 pockets to compartmentalize it.

The material is protected by a rigid body.

Bags - 4 colours: red, navy, green, yellow
Internal pocket - 1 colour: black

TRAVELLER'S BAG

This spacious and practical travel bag is perfect for carrying your personal belongings or equipment on board.

Flexible and foldable, it's easy to store when empty.

With its large volume and quick access to contents, it's ergonomic thanks to its shoulder strap and handles.

Designed to get straight to the point, it's made from sturdy materials suitable for both personal and professional use..

Ref. SC703232 - Dim L70 x H32 x D32 cm

ANCHOR BAG

Anchor bag with shoulder strap, ideal to store your anchor chain and secondary mooring rope buoy but also your whole anchor set and security kit for your tender.

Ref. CO452425 - Dim. L45 x H24 x D 25 cm

WATERPROOF BACKPACK

WATERPROOF, HARD-WEARING BAGS!

Zulupack waterproof bags are designed to withstand water, mud, sand and even frost (down to -15°C/5°F). Thanks to high-frequency welding and a roll-up closure, the contents of your bag will be protected in all circumstances.

TECHNICAL & SERVICE BACKPACK

THE MULTIPURPOSE BACKPACK

The technical and tertiary backpack is ideal for carrying all your personal belongings (tools, PC/tablet, files, notebook...) as well as a few important tools in the front pocket (screwdriver, pens, ruler, pliers...).

Ref. SD294515,PG,6C - Dim. L29 x H45 x D15 cm

4 ways of carrying it!

TOOLS STORAGE RANGE

Since the beginning, Outils Océans has been designing and manufacturing ultra-resistant crates and tool bags for sailors, capable of withstanding extreme conditions. Featuring an unbreakable semi-rigid frame, our bags are resistant to acids, hydrocarbons, humidity and temperature variations, while being easy to wash. Our range, from panniers (COT, CO1, CO10) to multi-purpose bags (CO2, CO3) and organised stowage (CO5, SD324516), covers all your needs.

FENDERS

FENDERS

Developed over more than 20 years for offshore racing yachts, Outils Océans flat fenders are designed to remain flush against the hull.

They protect delicate hulls, as well as paintwork and vinyl wraps, from abrasion. Manufactured using ultra-durable materials, they are engineered to withstand tearing forces, impacts, punctures, salt water, hydrocarbons, and UV rays. They can even double as a boarding step!

These fenders are the result of our extensive experience, our rigorous design methods, our passion for innovation, and our commitment to providing you with high-quality products made in France.

Ref. PB244610 - Dim. L24 x H46 x D10 cm - White, grey, navy

Ref. PB405510 - Dim. L40 x H55 x D10 cm - White, grey, navy

Ref. PB405520 - Dim. L40 x H55 x D20 cm - Grey

PONTOON FENDER

This pontoon fender provides the peace of mind that your hull remains protected during gales, harbour manoeuvres, and other challenging situations.

Manufactured from ultra-durable materials, the pontoon fender is engineered to withstand tearing forces, impacts, punctures, salt water, hydrocarbons, and UV rays. The oblong mounting holes located on the rigid batten allow it to be adapted to all types of pontoons.*

** Please consult the manufacturer or the marina authorities to determine the specific tools and hardware required for correct installation (e.g. T-head bolts, tapped backing plates, etc.).*

Ref. PB1104010, RB, Ponton - Dim. L110 x H40 x D10 cm - Grey

FLAT FENDER - 3 ELEMENTS

This flat fender, featuring three interconnected sections, has been specifically designed to meet the unique requirements of RIBs (Rigid Inflatable Boats).

Its versatile design also makes it suitable for all types of vessels, serving as either a corner fender or bow protection. Durable, lightweight, and easy to stow!

The segmented design allows it to be folded into three, significantly saving on storage space.

Ref. PB407205, 3GL - Dim. L40 x H72 x D05 cm - Black

L-SHAPED FENDER

The Outils Océans L-shaped fender has been engineered to provide effective protection for particularly exposed areas during harbour manoeuvres and berthing.

Drawing on offshore racing experience, this fender combines lightweight design with robustness and ease of use.

It is ideal for catamaran swim platforms, transom corners, and the rubbing strakes / rub rails of small sailing boats.

Ref. PBL404510, L25, GL - Dim. L40 x H45 x D10 cm - Grey

PROTECTION RANGE

GUARD LINE PROTECTION

Our lifeline cover features specific enhancements for even greater safety and durability:

- internal spiral ubing to protect against chafing and shearing
- high-density foam
- laced closures at the ends

Ideal for enhanced comfort while steering or hiking.

Ref. HP1003 - Dim. L100 x Ø 3,5 cm

MOORING LINE PROTECTION

To provide effective chafe protection, an EVA foam lining is sewn inside the double-sided PVC-coated polyester fabric.

Once tightly rolled and secured by the full-length Velcro, this design ensures the padding remains firmly in position.

Ref. HP1140 - Dim. L11 x H40 cm

TURNBUCKLE PROTECTION

In addition to the clean look, your turnbuckles are fully protected.

These covers make your maneuvers safer by protecting your lines from cotter pins and preventing them from snagging. They also prevent injury when moving around the deck. The cover is secured using a strap passed under the chainplate and a Velcro strip along its entire length.

Ref. HP1745 - Dim. L17 x H45 cm

WINCHHOUSE

Winches are essential elements on board but they are subject to constant aggression from UV rays which weaken the material, from fine particules (pollution, sirocco) which foul the mechanisms and from condensation which promotes internal oxidation.

Simplify maintenance and extend service life

The premium fabric protects against UV rays, dust and heavy rain, while the ventilation system prevents condensation and oxidation. The exclusive clamping system secures the Winchhouse while keeping your genoa sheets in place. In port, its high-end design and finish add a touch of elegance to the cockpit.

Ref. HPW161716,RV,SW - Dim. L16 x H17 x D16 cm

Ref. HPW182018,RV,SW - Dim. L18 x H20 x D18 cm

MAGIC-REBOARD®

Ref. ESR27350,11E,TA

Ref. ES27295,9E,TA

Magic-Reboard is a rescue reboarding Ladder, easy to install and easy to use. It has been designed to reboard

Discover our new models for more security and visibility

- ▶ A new reflective tape (SOLAS Norm)
- ▶ The rope has reflective threads and is directly attached to the ladder to create an adequate lifeline, allowing to hang on and get closer to the ladder when the boat is moving.

EMERGENCY LADDER
MAGIC-REBOARD®

MAGIC-REBOARD® - HOW TO USE IT

The pull-cord is operated from the water to trigger the ladder's deployment. It unfolds automatically and enters the water. The ladder's length makes it compatible with most boats on the market.

The ladder is specially designed to sink into the water on its own, making initial boarding much easier.

Simple to install and use, it complies with the EN/ISO 15085* standard and European Directive 2013/53/EU*. It fits all major boat sizes and is installed on the stern rail using a lark's head knot.

Magic Reboard is available in two models:

- ▶ **Ref. ES27295,9E,TA** - 9 reinforced flexible steps
- ▶ **Ref. ESR27350,11E,TA** - 11 rigid steps*; during recovery, at least 4 steps must be in the water. The width, spacing, and reinforcements of the steps are specially engineered to make reboarding easier.

MAGIC-REBOARD® PONTOON

PONTOON EMERGENCY LADDER

Designed for safe, unassisted reboarding onto pontoons / docks in the event of a fall overboard, its operation is both simple and functional.

Its location is highly visible: from the water, users can easily spot the orange pouch with its retro-reflective strip, while those on the pontoon are guided by the orange signage plate with a retro-reflective border.

CONFORMITY & ADAPTABILITY

The pontoon safety ladder is based on the same design as the on-board recovery ladder.

It is adaptable to all types of pontoons / docks.

PERSONAL PROTECTION RANGE

BENEFICIAL ALERT BEACON - BAB'So

My link to life - Safety, survival, psychological support equipments

AN ACCIDENT HAPPENS TO ME, WHAT ARE MY CHOICES?

BAB'So is a device designed to significantly increase the **visibility of a person in distress**. It is a fully passive system that requires no network and no batteries.

Lightweight and compact (weighing less than 80 grams) and fully reusable, it can be activated **in under 10 seconds**, increasing visibility by approximately **150 metres**.

Providing both technical & psychological support, **BAB'So** is a source of hope that helps the casualty maintain their will to survive.

BAB'SO'S ASSETS

- 01. **To be seen, heard and identified**
(The trackers geolocate but do not allow to be seen!)
- 02. **Reliable, simple** in its operation, **compact & versatile**
- 03. **To be visible** in all circumstances day and night
(ISO Standard & emission of about 16 hours of light CE)
- 04. Personal and medical **identification** (ID strips)
- 05. **To be heard**: whistle 60 dB
- 06. A 150cm connecting lanyard, resistant to 150 Kg of traction. to **hang, repair, being bind** to an object or person
- 07. **To provide a sense of presence**, fuel the imagination, and offer practical solutions
- 08. To restore hope, and with it, a vital connection to life
- 09. **To buy time**—to save more lives and ensure safety
- 10. And even an emergency splint! And much more!

FIRST AID BAG

Designed and engineered to accommodate the regulated medical supplies (RSO) for on-board pharmacies.

While designed for maritime use, this first aid kit is highly versatile and suitable for other industries. It fits perfectly inside the Matos60 bag, with the capacity to hold two units.

It features a list holder under the flap, designed for prescriptions and product instructions. On the exterior, a label holder allows for easy identification of the contents.

Multiple compartments are provided to organise all types of supplies: creams, disinfectants, dressings, scissors....

WORK HARNESS & FALL PROTECTION

Two essential complementary accessories for the ultimate in solo safety: the work harness and its fall arrest device.

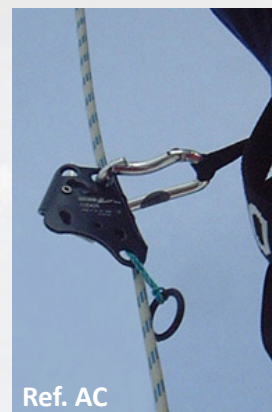

This system allows you to sit securely in the harness and rest during your ascent. Furthermore, it provides the lateral mobility needed to reach your spreaders.

The work harness guarantees absolute safety and exceptional comfort, both during the climb and descent, as well as while working at the masthead.

Derived from mountaineering technology, the fall arrest system attaches to a spare halyard and locks instantly in the event of a fall. During the ascent, the device follows the user's movement naturally.

During the descent, the user must manually slide the fall arrest device down at regular intervals.

SOLO MAST-CLIMBING LADDER

MAGIC-MÂT

ECHELLE DE MAT **MAGIC-MAT®**

The Magic-Mât ladder is the simplest solution for climbing the mast unassisted.

Featuring alternating rungs and a top "platform"—both lined with polyethylene—it ensures optimum comfort and safety. The ladder is available in lengths of 3, 7 or 9 metres and comes in a large storage bag. It is designed to be extendable (by 2, 3, or 7 metres) to adapt perfectly to the height of your mast. Whether you are changing a light, working on the spreaders, or fitting a wind vane, you can perform all mast-top tasks safely using the safety kit: the work harness and fall arrest device.

The use of a harness **and** a fall arrest device (from Outils Océans or another manufacturer) is mandatory for your safety. The fall arrest device attaches to a spare halyard, which acts as your lifeline, and is secured to the harness.

MAGIC-MÂT® - HOW TO USE IT

Attach the mainsail, spinnaker, or genoa halyard to the eye at the top of the ladder (on the side with two rungs facing each other).

Hoist using the selected halyard.
Ensure the ladder is clear of any twists.

Attach a line to the eye at the bottom of the ladder and secure it to the gooseneck or a fitting at the mast foot.

Tension firmly using the halyard.

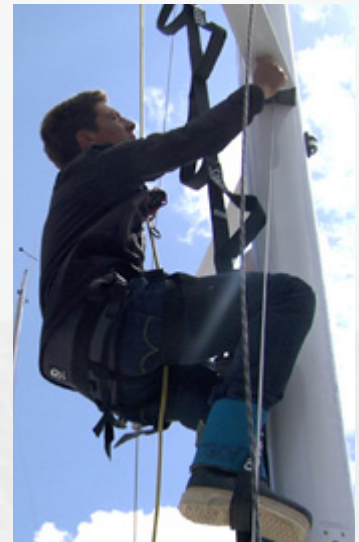

Climbing:

- Grip the mast with your hands.
- Place your feet against the mast; push off with your legs, alternating right then left. This creates a natural, slight rotation of the body around the mast.

When pushing with your right foot, your body shifts to the right of the mast; when pushing with your left, you shift to the left.

At the masthead, with your feet securely placed in the rungs and your back supported by the harness, your hands are completely free.

Your arms will no longer fatigue; you are positioned above your work, allowing for maximum leverage and ease of movement.
