We share common goals with your teams in relation to **prevention, safety, hygiene, quality and environment:**

- ▶ Boosting the safety of your technical teams
- ▶ Improving working conditions
- ▶ Ensuring service quality
- ▶ Increasing productivity & performance

We are constantly improving and expanding our product range to ensure we provide you with ever-increasing levels of:

- ▶ Quality
- ▶ Safety
- ▶ Ergonomics & comfort
- ▶ Productivity

within your working environment.

Much more than just accessories, your technical storage solutions help you achieve your goals.

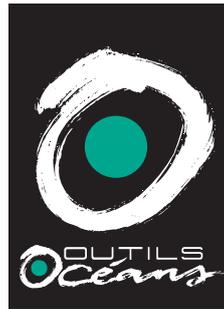

Our core business is the **research, design, and manufacture** of textile and semi-rigid equipment intended for the storage, transport, and protection of all types of objects or documents.

Discover why and how.

Outils Oceans was founded in 1987 by a former ocean racer to meet the need for a "sailor's toolbox".

This is how the first tool bags from Outils Océans are travelling the world thanks to renowned sailors.

Our experience in ocean racing allows us to test our products and materials under extreme conditions.

Outils Oceans' Professional Storage division subsequently expanded to meet the requirements of the energy and telecommunications sectors. These industries value the semi-rigid nature of our products, which provides protection, durability, and a reduced tare weight.

Through a professional approach based on **expert consultancy**, we support you from the initial project study right through to the deployment of solutions. Your dedicated point of contact provides **personalised follow-up**, including on-site audits, technical specifications and after-sales service...

Our greatest source of pride is the long-term relationship of trust that we establish and maintain with you, regardless of your sector: industry, maintenance, construction, shipbuilding, aerospace, agri-food, energy, telecommunications, professional equipment distribution, and more.

We are fully committed to the values of sustainable development and Corporate Social Responsibility (CSR), from initial design through to the processing of end-of-life equipment.

Innovation is the driving force behind the development of Outils Oceans. We regularly test and integrate new materials and cutting-edge technologies.

You can be assured of the commitment of our crew of over 30 staff members to your total satisfaction.

CONCEPT

Our concept is based on three core pillars

ERGONOMICS

- Unladen weight: 30% to 50% weight saving on empty products
- Carrying systems designed to protect the user: back, shoulder, and wheeled options.

Selection based on the specific task and the working environment.

DURABILITY

- Deformable & unbreakable materials
- Resistance to harsh substances & conditions such as acids, hydrocarbons, oil, extreme temperatures, grease, contamination, corrosion, etc.

EFFICIENCY

- Organised storage for enhanced safety & productivity
- Equipment protection to extend its service life

Unique and sustainable design

> Storage solutions for tools

Our concept is based on a **semi-rigid frame, shape-memory internal structure**, allowing us to offer tool bags and pouches that are ergonomic, lightweight when empty, and highly durable.

SEMI-RIGIDE STRUCTURE

Thermoformed, shape-memory internal structure, stitched directly to flexible materials

FEATURES

Textile tool belts with top hems: fixed opening, easy to grab tools with one hand.
Protection along the height of the insulating sheaths of TST BT tools.

CANVAS FLAP

Waterproof: protect against splashes and sprays
Fire retardant (optional): provides additional safety in high-risk environments.

FINISHING TRIM

Absorbs abrasion: designed to withstand wear and tear.
Protects assembly stitching: ensures long-term structural integrity.

Our products have a service life of 5 to 8 years, depending on usage.

Outils Océans is a Breton SME with over 30 employees, located in Finistère at La Forêt-Fouesnant, where our head office and manufacturing workshop are located.

DESIGN, CONCEPTION & MANUFACTURING SINCE 1987

A well-structured, well-equipped design office, constantly on the lookout for new developments

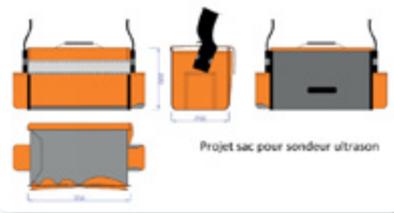

Our design office optimises:

- ▶ working methods
- ▶ the ergonomics of workstations and tools
- ▶ the use of materials and accessories

Equipped with design and drawing software, it designs the equipment and supervises their production. .

It takes into account sustainable development from the design phase to the end of the product's life:

- ▶ Minimising the consumption of materials and resources
- ▶ Maximising functions
- ▶ Research and Development: materials, technologies, know-how
- ▶ Maximize the lifespan
- ▶ Maintaining existing equipment
- ▶ Managing end-of-life products

Modern, well-maintained technical resources

We moved to new premises in 2021, spanning 2400 m², offering organized spaces and a comfortable working environment

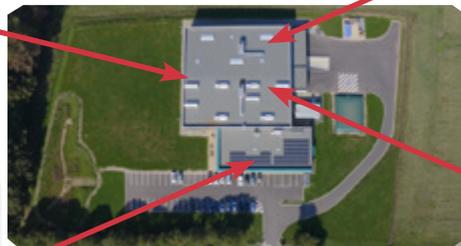

We have a:

- ▶ Cutting workshop equipped with presses, thermoforming machine, automatic cutting table
- ▶ Manufacturing workshop equipped with ultrasonic and high-frequency welders, sewing robots, sewing machines (flat, cylindrical, edging), and a range of machines for attaching accessories.
- ▶ Prototyping workshop equipped with a cutting table, a sewing machine, including one with an extended arm.

Manufacturing workshop

Storage

PEOPLE ARE AT THE HEART OF OUTILS OCEANS' FOUNDING VALUES

This is reflected in all our relationships: whether externally with our customer and supplier partners, or internally with our employees.

To be a customer is to step on board with us and become a member of the Outils Oceans crew!

You are at the center of our concerns. Beyond our contractual relationships, we maintain a real partnership with you over time. In our approach, we prioritize diagnosis and advice, followed by work methods before proposing solutions and equipment.

We are committed to contributing to the maintenance of industrial employment in France:

- by offering you French manufacturing whenever possible
- by promoting our production workshop and its associated services (responsiveness, quality, after-sales service, etc.).

The Management of Outils Océans has developed a sustainable development and CSR charter since taking office in 2012. This charter fully aligns with the company's values and leads to concrete actions every year.

We are delighted to share with you our four main commitments, illustrated by our actions, and to provide you with the benefits of CSR

1 Designing and providing sustainable products

OUR ACTIONS

AT OUTILS OCÉANS

- ▶ Versatile products that will stand the test of time
- ▶ After-sales service / repair / deconstruction / recycling
- ▶ ESAT partnership

Let's go further together!

Maintenance and end-of-life treatment of products

2 Managing resources

OUR ACTIONS

AT OUTILS OCÉANS

- ▶ Eco-design: choosing less polluting and recyclable materials, optimising cutting plans, reusing and recycling offcuts
- ▶ Example of 100% recyclable polypropylene fabric > elimination of PVC and recyclability
- ▶ Internal projects: internal use of the Elise EDM, distribution of water bottles for refilling at water coolers and cups for use at the beverage dispenser..., new premises with solar energy production, charging stations for electric vehicles, renewal of our vehicle fleet (plug-in hybrids)
- ▶ Grouping of our supplies and maritime freight in case of import

Recyclability of our tool bags

3 Maintaining a genuine partnership with customers, suppliers and partners

OUR ACTIONS

AT OUTILS OCÉANS

- ▶ Advice and personalised follow-up
- ▶ Guaranteed compliance: with commitments, environmental standards and social standards
- ▶ Outils Océans has been a member of the "United Nations Global Compact" since 2013.
- ▶ Continuous improvement of working conditions: ergonomic workstations (gallows, automatic cutters, tool carts...)
- ▶ Transparency for customers

YOUR CSR BENEFITS by choosing Outils Océans

- Optimisation of ownership and operating costs
Maintien en conditions opérationnelles
- Recyclability of products and actual recycling at end of life
- Compliance with specifications and commitments
- Environmental and social compliance
- Improved working conditions for users
- Innovative solutions
- Made in France

4 Helping to maintain industrial jobs in France and contribute to local life

OUR ACTIONS

AT OUTILS OCÉANS

- ▶ Priority to French manufacturing as long as economic constraints allow.
- ▶ Desire to maintain technical expertise and our ability to innovate.
- ▶ Support for local associations: Entreprendre Bretagne Network, Finistère Offshore Racing Hub, Figaro-Bénéteau Class.

What are our users' main sectors of activity?

“More than just a luggage manufacturer, we contribute to prevention initiatives among field teams, supervisors and managers responsible for prevention and safety.”

- › "Our industry experts draw on your first-hand operational needs and understand the specific requirements of your trade.
- › From your working environment to your physical movements, every need and constraint is analysed to provide you with the best possible advice.

OUTILS OCÉANS' ORIGINAL CREATION
THE SEMI-RIGID TOOL BAG: THE BEST OF A TOOLBOX AND A BAG

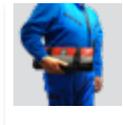

The semi-rigid tool bag, created by Outils Océans, features an original design that combines flexibility and rigidity through two complementary materials. It is built around a U-shaped semi-rigid frame for enhanced water-proofing and superior protection of the stored equipment.

TOOL BOXES

These tool bags are designed for routine minor maintenance and emergency repairs.

The CO1 tool bag is designed for all minor maintenance professionals. Engineered for carrying a curated tool selection, it features a wide opening for direct access. Compact and lightweight!

Ref. CO1

Dimensions L38 x H15 x E15 cm

Net weight: 0,450 Kg

Colours: Red or Black

The CO10 tool bag is the modern take on the traditional plumber's bag. It is ideal for carrying **bulky tools** (such as pipe wrenches, adjustable spanners, pipe benders, and gas spanners). Its reinforced sides and integrated flap prevent your tools from falling out or being lost.

Designed with plumbers and gas engineers in mind, its length has been extended to accommodate a **torque wrench**.

Prevents tools from falling out

Ref. CO501515N

Dimensions L50 x H15 x E15 cm

Net weight: 0,700 Kg

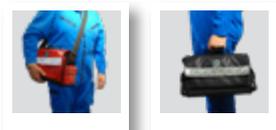

Made from 100%
recyclable material

TOOL BAGS FOR MOBILE MAINTENANCE

Designed for **mobile maintenance**, these tool bags allow you to carry a curated selection of tools for targeted interventions, depending on the model.

Tool-loop partition
=
Enhanced layout

Sleeve

Ref. CO3
Dimensions L35 x H20 x E10 cm
Net weight: 0,750 Kg
Colours: Red or Black

Ref. CO2,NF
Dimensions L45 x H24 x E26 cm
Net weight: 1,100 Kg
Colour: Black

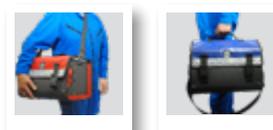

Dedicated to minor maintenance, this bag offers highly versatile internal layouts. It can accommodate a wide range of tools, administrative documents, and electrical or electronic accessories.

Provides a panoramic view of all products and power tools.

Boasting high capacity and durability, the internal layout with a tool-loop partition ensures organised storage. It is designed to adapt to your trade.

LARGE ORGANISED STORAGE - ELECTRICIANS

Comprehensive tool bags that allow you to carry a wide range of equipment with multiple storage options. You will appreciate the wide opening, providing a complete overview of your tools so that nothing is ever left behind.

on demand

Ref. CO6
Dimensions L40 x H28 x E17 cm
Net weight 1,800 Kg

Ref. CO5
Dimensions L45 x H28 x E26 cm
Net weight: 2 Kg

Perfectly suited for installation, maintenance, and on-site service professionals, the CO6 bag is ideal for all mobile intervention teams.

ORGANISED MOBILE TOOL TROLLEY

For your construction sites, maintenance, and on-site installation, the semi-rigid textile tool carrier offers you:

Ref. CO2,NF
Dimensions L45 x H24 x E26 cm
Net weight: 1,300 Kg

Ref. CO453626,RL
Dimensions L45 x H36 x E26 cm
Net weight: 3,700 Kg

Full net weight: 5 Kg

MAXIMISE STORAGE, MINIMISE WEIGHT!

A detachable tool bag that secures along the handle above the wheeled storage unit, featuring:

- ▶ 2 compartments, tool-loop partition and 2 pockets
- ▶ Shoulder strap and handles for independent use when needed (uneven terrain, stairs, difficult-to-access or confined spaces, etc.).

A large wheeled storage unit featuring:

- ▶ A compartment for power tools & bulky equipment, with 2 dedicated slots for devices
- ▶ An organised storage section with tool-loop partition and a compartment for documents or a tablet/PC (optional protective foam available)

Even with the tool bag attached on top, you can access the tools in the wheeled unit by simply opening and tilting its front panel.

TOOL BAGS - WORK AT HEIGHT

Result of 20 years of field experience, it provides safety required for work / operations carried out at height.

Ref. CO252211
Dimensions L25 x H22 x E11 cm
Net weight: 0,550 Kg

Tool slots

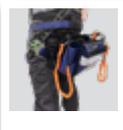

Its ingenious layout makes tools immediately **visible and accessible.**

Extremely robust, these bags are ultra-light weight, allowing them to be worn on a tool belt or a work harness.

The CO252211 bag is suitable for a wide range of tasks and can be customised by every user.

Flexible transport solutions

HANDS-FREE WORKING!

TOOL BUCKET - WORK AT HEIGHT

A hanging tool bucket dedicated to work at height and the transport of LV Live Working tools, ensuring complete safety on the job.

Square-shaped for extra stability!

Ref. SO252825,AN
Dimensions L25 x H28 x E25 cm
Net weight: 0,850 Kg

▶ Tailored internal layouts

15 tool-loop partitions for organised storage, positioned on the sides for easy access, even when wearing bulky insulating gloves.

▶ Robust & Durable

Manufactured from shatterproof materials, built to resist impacts, hydrocarbons, and moisture, while standing the test of time. Ultra-lightweight design.

TOOL BELT

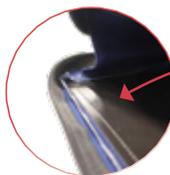

Ref. COT301606 (Fixed-pouch tool belt)
Dimensions L30 x H16 x E06 cm
Weight: 0,310 Kg

Ref. COT261105 (Adjustable modular tool belt)
Dimensions L26 x H11 x E05 cm
Weight: 0,270 Kg

Ref. COT211105 (Adjustable modular tool belt)
Dimensions L21 x H11 x E05 cm
Weight: 0,230 Kg

Les soufflets latéraux permettent d'éviter que les outils ne tombent. Le côté rigide crée une tablette de travail !

ONE BELT, ENDLESS POSSIBILITIES

Designed for small-scale interventions, our tool belts were quickly adopted by electricians and technicians alike.

The COT belt allows you to keep a selection of essential tools close at hand—rather than in your pockets—for enhanced safety. Ideally suited for the industrial and food-processing sectors.

THIGH BELT BAG

The COT belt-and-thigh tool pouch is ideal for carrying small tools, working at height, and operating in confined spaces.

Ref. COT142807,thigh
Dimensions L14 x H28 x E07 cm
Weight: 0,300 Kg

Enhanced access opening
=
Easy access wide mouth

*Adaptation Client

Versatile mounting solutions

Waist & Thigh

Belt & Thigh

Whether worn along the leg or at the waist, there is no longer any need to bend down to retrieve equipment from the ground. Your gear stays within arm's reach and out of your pockets in a dedicated storage solution.

The COT leg pouch is designed to protect LV Live Working tools. Originally a tool carrier, the COT belt also meets your needs for transporting small PPE (gloves, masks, etc.).

No more tools in your pockets means fewer injuries in the event of trips or falls.

MODULAR TOOL & PPE BACKPACK

Built for mobile technicians, our customisable bags cater to all professional trades.

OPTIONS

Side pockets

Extra partitions / dividers

23L

Ref. SD324516,1C
Dimensions L32 x H45 x E16 cm
Net weight: 1,650 Kg

In addition to carrying a helmet, gloves, and insulating mat, the SD324516,1C backpack can be configured with optional inserts to store hand tools, small power tools, or measuring instruments. Its compact size ensures safe access when climbing caged ladders.

With its removable dividers and detachable trolley, you can customise your bag to suit your specific tool kit and equipment. Everything you need is kept right at your fingertips.

4 detachable internal partitions

30L

- 1 insulating mat pocket
- 4 side loops for hanging gloves, pouches, etc.

Ref. SD344520,2C
Dimensions L34 x H45 x E20 cm

PPE BAGS

> PPE Solutions

Our concept is built on functional layouts that enhance equipment protection and extend service life. Carrying solutions are tailored to both the task and the work environment, with a clear focus on preventing MSDs.

NEXT GENERATION OF PPE RANGE

Your Outils Océans PPE bag empowers users.

Features

- ▶ Tailored to the PPE required on-site
- ▶ Enable quick visual inspections

Materials

- ▶ Built for environmental constraints: e.g., waterproof tarpaulin base and semi-rigid frame (depending on model)
- ▶ Heavy-duty construction for intensive professional use

Carrying solutions

Choosing the right carrying method based on the work situation:

- ▶ Equipment volume, weight, distance travelled...
- ▶ Requirement for hands-free operation

Reflective strips

- ▶ Technician visibility and safety

PPE SOFT DUFFLE BAG

ALL-TERRAIN PPE BAG

The ultimate kit to protect all your PPE: robust, waterproof, and designed for instant access to your PPE."

Belt or harness attachment

Pouch with magnetic flap

- Allows for gloves to be stored without folding
- Lightweight, robust and waterproof
- The flap ensures a complete seal
- Easy to clean with soapy water

- Colour-coding for visual safety management: colour-coded borders corresponding to glove classes (00, 0, 1, 2, 3 and 4)

BAGS FOR INSULATING MATS

These enclosed storage units are designed to house, protect and transport insulating mats for technicians in the Energy sector.

 A kit of 2 straps with fasteners allows the storage unit to be secured to the workbenches in each vehicle. With 2 press-studs, the bag can be quickly removed from its position.

 During transit, the mat is stored vertically, eliminating the risk of falling or impact.

Ref. PO701111,CE,AN,2BF
Dimensions L70 x H11 x E11 cm
Net weight: 0,700 Kg

 **MATERIAL**
100% RECYCLABLE
*non toxic

Ref. CO1051212,CE,BD,4BF
Dimensions L105 x H12 x E12 cm
Net weight: 1,350 Kg

BENEFITS

Their flexible yet semi-rigid structure allows for mats to be stored and securely held in place without folding. The full enclosure protects the mat from impacts and external factors (UV, moisture, etc.). Lightweight, robust and waterproof for simple, easy cleaning with soapy water. Hands-free operation thanks to the shoulder strap!

WATERPROFF BAGS

Zulupack bags guarantee waterproof performance thanks to their high-frequency welded seams and roll-top closures.

FOR WHOM?

For use in environments exposed to water spray, sand or mud.

Engineered with high-quality, durable materials, these bags are resistant to abrasion, tearing, and freezing temperatures (down to -15°C).

AERONAUTICS

All bags in the range feature a main compartment, allowing you to transport and protect your equipment and sensitive documents.

Maximum comfort: the padded shoulder straps, thermoformed back panel and lightweight design provide incomparable comfort.

High capacity to store all your PPE and gear in a single bag.

Zulupack bags are designed to make life easier for their users. Multiple external pockets and numerous internal storage compartments allow for all their gear to be neatly organised.

MUD, SAND OR WATER—NOTHING STANDS IN THEIR WAY!

The roll-top closure ensures foolproof waterproofing.

By rolling the closure 3 to 4 times, your bag can come into contact with water, sand or mud while keeping its contents fully protected.

VEHICULE KEY & DOCUMENTS HOLDERS

The CP1015 and CP1824 pouches are specifically designed for storing vehicle keys and documents.

The large ID tag holder allows you to identify a vehicle, a registration number, an individual or a team.

Ref. CP1015
 Dimensions L10 x H15 cm
 • 2 vehicle documents sleeves (registration, insurance)
 • 2 card holders (Fuel cards, maintenance cards, etc.)

Ref. CP1824
 Dimensions L18 x H24 cm
 • 2 document pouches: accident report forms, general paperwork...
 • 3 vehicle document sleeves: registration, insurance certificates...
 • 7 card holders: fuel cards, maintenance/service cards...

INTERVENTION BRIEFCASE

Robust, rigid and waterproof, the BI document holder allows you to transport and protect your documents.

Its rigid backing with an integrated clipboard, various storage compartments, and pen holder make it a practical and reliable tool for professionals on the move.

It is also perfectly suited for holding all vehicle documentation.

Ref. BI243402, CI, CE
 Dimensions L24 x H34 x E02 cm
 Weight: 0,060 Kg

Optional ring mechanism available upon request
 Enquire for further information.

PROFESSIONAL & TECHNICAL BACKPACK

This technical and service sector backpack is designed to carry paper documents, technical instruction binders, a laptop or tablet with charger and mouse, as well as a selection of tools.

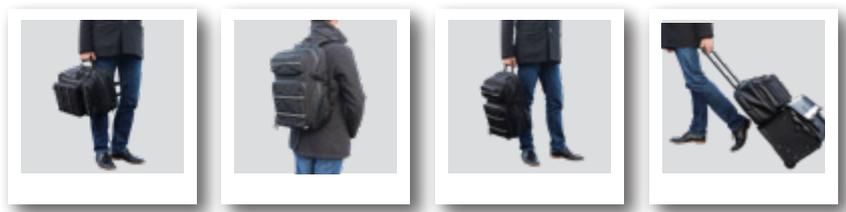

With its multi-compartment design, numerous pockets allow you to partition and organise all your gear. Compact and versatile, it is your perfect ally for commuting by public transport or as cabin luggage.

A rear trolley sleeve also allows you to secure the bag to a suitcase handle.

Ref. SD294515, PG, 6C
 Dimensions L29x H45 x E15 cm
 Net weight: 1,250 Kg

 **4 Carrying Options!**

7-POCKET DOCUMENT ORGANISER

ON DEMAND

This multi-compartment document holder allows you to store all vehicle documentation at the front of the cabin.

Ref. TN342436
Dimensions L34 x P24 x H36 cm
Net weight: 1,100 Kg

- Practical and functional, the fan-fold opening provides easy access to all documents, allowing for a quick check to ensure nothing is missing..
- A Velcro flap ensures the document holder remains securely closed, regardless of the load volume.

 **vehicle attachment system**

FIRST AID POUCH

Carry your first aid kits anywhere and on every intervention with this optimised storage solution.

Ref. SC282428,2CE,6C
Dimensions L28 x H24 x E28 cm
Net weight: 0,600 Kg

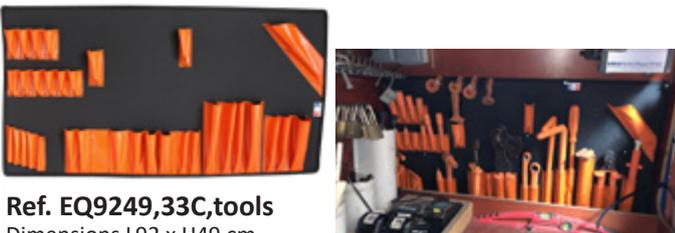

18L

MATERIAL 100% RECYCLABLE
*non toxic

- **Visibility**
Thanks to its various compartments, you can quickly identify any missing equipment or items that need restocking.
- **Organised storage**
The underside of the flap features a dedicated pocket for medical instructions and product usage guides. On the top, an external ID tag holder allows for easy labelling of the contents. Multiple compartments are available to organise all types of supplies (creams, disinfectants, etc.).

VEHICLE TOOL SUPPORT

Optimise your vehicle storage!

Ref. EQ9249,33C,tools
Dimensions L92 x H49 cm
Weight: 0,700 Kg

Organised storage for both your tools and your vehicle. Protected Live Working (LW) tools maintain their insulating properties.

PROTECTIVE GROUND SHEET

Worksite ground sheet designed to protect both tools and operators from floor-level dirt and moisture.

Ref. TP150100
Dimensions L150 x H100 cm
Weight: 0,900 Kg
Available in 50 x 50 cm

Designed to be laid on the ground to spread out all the tools required for installation line work. This ground sheet ensures the protection of your Live Working (LW) tools within the worksite area. Crafted from waterproof and heavy-duty fabric.

LUNCH BOX

The ideal insulated bag for carrying your lunch on every intervention.

Corporate Identity

- Carry your lunch to the workplace or on the move (lunch boxes, water bottles, snacks, cutlery, etc.) and keep it fresh thanks to the dedicated ice pack compartment and insulating foam.

- **Hygiene & Safety:** your lunch is kept secure in a closed, insulated container. The lunch box is easy to clean and can be disinfected by spraying or wiping. Available in several colours. Customisable.
